DETAILED ACTION

Claims 7 and 21-24 are pending in the application. Because of an error in the last Office Action, the following is required.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 7 and 21-23, drawn to products of formula (I) wherein **X is oxygen**, classified in class 558, subclass 182.

→ II. Claims 7, 23 and 24, drawn to products of formula (I) wherein **X is NH**, classified in class 558, subclass 170 and class 548.

The inventions are distinct, each from the other because of the following reasons: the products of Group I and Group II differ materially in structure and element so much so as to be patentably distinct. In

addition, a reference which anticipates one group may not even render obvious the other.

Because these inventions are distinct for the reasons given above, have acquired a separate status in the art as shown by their different classification and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.

Further, Applicant is required under 35 U.S.C. 121 to elect a single disclosed species that is embraced by whichever Group is elected, even though this requirement is traversed.

Applicants are required to provide an Example number, page number in the specification and a structural depiction of the elected species when responding to this Office Action.

Moreover, whatever specific compound is ultimately elected, applicants are required to list all claims readable thereon.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

It is suggested that in order to advance prosecution, the non-elected subject matter be cancelled when responding to this Office Action.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Applicants state a notice to make drawing changes was included in the previous Office Action. In response, this matter will be addressed when a first action on the merits is provided by the Examiner.
